

STATEMENT OF CARBON NEUTRALITY

*Robertson
2020*

*November
2021*

Subject of Declaration

The subject of this statement includes all activities under the Robertson operational control, covered under Scopes 1, 2 and 3 of The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (Revised Edition) as detailed within this report. This statement is compatible with international standards ISO 14064 and PAS 2060.

Carbon Neutrality

Carbon neutrality refers to achieving net zero carbon dioxide emissions by balancing emissions with carbon removals (i.e. carbon offsetting). This is important as it allows global balancing of emissions while emissions reduction strategies are being implemented.

Why is Carbon Neutrality Important?

To avoid the worst effects of climate change, we need to take responsibility for our impact and act now to limit global temperature increases to 1.5 degrees Celsius, or well below 2 degrees Celsius above pre-industrial levels.

As set out in the Paris Agreement, offsetting plays an important role for rapidly deploying environmental solutions where it is economically most viable. This helps to bridge the gap between now and the time our societies will be able to phase out Green House Gas (GHG) emitting technologies.

In that respect, the Paris Agreement aims to accelerate the transformative change needed to reach carbon neutrality, ensuring that countries around the world will be increasing their ambition and action over the second half of the twenty-first century, while also supporting the achievement of Sustainable Development Goals.

Organisation details:

Robertson

Robertson House
Castle Business Park
Stirling
FK9 4TZ

Period during which the entity is demonstrating that carbon neutrality of the subject has been achieved:

1st July 2020 to 30th June 2021

Assessment validated by:

One Carbon World Ltd.

Recorded total GHG emissions during the measurement period:

8924.23 tons CO_{2e}

Activities/Emissions included in footprint:

Activity Type	2020 Total Tons CO _{2e}
Fuel use on site (diesel)	3883.87
Fuel use on site (gas)	4.90
Fuel use in owned properties (gas / eco gas)	81.28
Fugitive emissions (AC units in owned property)	0.00
Commercial vehicles (owned)	56.58
Electricity use on site	1077.00
Electricity use in owned properties (renewable energy source)	(215.18)
Commercial vehicles (leased)	536.39
Business travel (company cars) (leased)	130.01
Business travel (non-fleet / private vehicles)	840.26
Business travel (air)	2.03
Business travel (rail)	0.66
Downstream transport (waste)	369.82
Gas use in leased property	44.01
Electricity use in leased property (billed) (renewable energy source)	(63.10)
Electricity use in leased property (benchmarked)	51.92
Electricity use in leased industrial space (billed) (renewable energy source)	(1.43)
Electricity use in leased industrial space (benchmarked)	9.57
Electricity transmission and distribution	118.59
'Well to tank'	1106.67
Water use on site	72.41
Working from home	372.39
Disposal of waste generated in operations	161.51
Waste in offices	2.94
Total Emissions tCO_{2e}	8,924.23
Neutralised by Carbon Credits From Projects tCO_{2e}	11,024.00
Total Net Emissions tCO_{2e}	-2,099
Result	Climate positive

Becoming Climate Positive:

Climate positive means going beyond achieving net zero carbon emissions by removing more carbon dioxide from the atmosphere than is being emitted by the activity. This is a way to accelerate progress towards reducing global emissions, while deepening climate action to eliminate emissions where possible.

Method Used to Achieve Carbon Positivity:

1,024 tCO_{2e} off-set through retirement of 1,024 Voluntary Carbon Credits from 'Weyerhaeuser Forest Plantations on degraded grasslands under extensive grazing'.

10,000 tCO_{2e} off-set through retirement of 10,000 Certified Emissions Reductions from the UN Clean Development Mechanism.

The carbon neutrality of the activities under the operational control of Robertson, listed in this Statement, has been achieved in accordance with the One Carbon World Carbon Neutral International Standard, for the period: 01/07/2020 to 30/06/2021.

12th November 2021

Carbon Credit Retirement Certificate from Verified Emission Reductions (VERs)

**Verified Carbon
Standard**

Certificate of Verified Carbon Unit (VCU) Retirement

Verra, in its capacity as administrator of the Verra Registry, does hereby certify that on 11 Nov 2021, 1,024 Verified Carbon Units (VCUs) were retired on behalf of:

Robertson

Project Name
"Weyerhaeuser Uruguay" Forest Plantations on degraded grasslands under extensive grazing

VCU Serial Number
9857-148496108-148497131-VCS-VCU-261-VER-UY-14-960-01012009-31122009-0

Additional Certifications

Powered by  APX

Carbon Credit Retirement Certificate from Certified Emission Reductions (CERs)

United Nations
Framework Convention on
Climate Change

DATE: 11 NOVEMBER 2021
REFERENCE: VC21211/2021

**VOLUNTARY
CANCELLATION
CERTIFICATE**

ROBERTSON

Presented to

One Carbon World

Reason for cancellation

Robertson

Number of units
cancelled

10,000 CERs

Equivalent to 10,000 tonne(s) of CO₂

Start serial number: IN-5-163683207-1-1-0-4463
End serial number: IN-5-163693206-1-1-0-4463

The certificate is issued in accordance with the procedure for voluntary cancellation in the CDM Registry. The reason included in this certificate is provided by the cancellor.
